

CERTIFIED SOC ANALYST (CSA)

Threat Monitoring · SIEM · Incident Response · Threat Hunting

Step inside a real Security Operations Centre. This programme trains you to monitor live environments, triage alerts at speed, hunt for hidden threats, and respond to incidents with the precision employers demand.

Covering 14 structured modules from networking fundamentals through to SOC KPIs and compliance, this is the most complete analyst training available.

PROGRAMME AT A GLANCE

Level: Beginner → Intermediate

Modules: 14 Structured Modules

Focus: Detection, Monitoring & Response

Tools: Splunk, QRadar, ELK, Wireshark

14

Modules

4

SIEM Platforms

MITRE

ATT&CK Mapped

100%

SOC Role Ready

14-MODULE CURRICULUM

MOD

1–
3

SOC Foundations & Security Monitoring

Security Operations Centre overview · Roles & types (In-house, MSSP, Hybrid) · CIA Triad · OSI & TCP/IP networking · IP addressing, ports & protocols · Firewall, IDS/IPS devices · Log management lifecycle · SIEM introduction & use cases

MOD

4–
5

SIEM Platforms & Threat Intelligence

Splunk, QRadar, ArcSight & ELK Stack · Log collection & normalisation · SIEM query writing & dashboards · Threat intelligence types (Strategic, Tactical, Operational, Technical) · Threat feeds: MISP, AlienVault OTX, VirusTotal · IOC integration into SOC workflows

MOD

6–
7

Endpoint & Network Security Monitoring

Windows & Linux logging fundamentals · Key Windows Event IDs · Sysmon & registry monitoring · EDR tools & host-based alerting · Packet capture & flow analysis · IDS/IPS with Snort & Suricata · NetFlow & PCAP analysis · Wireshark for traffic analysis · Detecting malware & lateral movement

MOD

8–
9

Use Case Development & Incident Detection

Threat modelling for detection design · Detection logic & SIEM rule creation · Tuning rules & reducing false positives · Deployment & testing of detection use cases · SOC alert handling process · Severity-based alert prioritisation · Initial investigation & triage techniques · Correlation for threat confirmation & escalation

MOD
10–
11**Incident Response & Handling**

Incident response phases (Preparation → Lessons Learned) · Playbooks & runbooks · Containment & eradication strategies · Evidence preservation & chain of custody · Incident reporting & post-mortem · SOC escalation procedures

MOD
12–
14**Threat Hunting, Malware & Reporting**

Hypothesis-based threat hunting with MITRE ATT&CK · Tools: Sigma rules, Velociraptor, KQL · Malware types & delivery mechanisms · Static & dynamic analysis · Sandboxing: Cuckoo, YARA, Hybrid Analysis · SOC KPIs: MTTD, MTTR, FPR · Executive vs technical reporting · Compliance: ISO 27001, GDPR, NIST

TOOLS & PLATFORMS

SIEM	Splunk · IBM QRadar · ArcSight · ELK Stack (Elasticsearch, Logstash, Kibana)
Threat Intel	MISP · AlienVault OTX · VirusTotal · Recorded Future · MITRE ATT&CK Navigator
Endpoint / EDR	Sysmon · CrowdStrike Falcon · Carbon Black · Windows Event Viewer
Network	Wireshark · Snort · Suricata · Zeek · NetFlow Analyser
Threat Hunting	Sigma · Velociraptor · KQL (Microsoft Sentinel) · Elastic SIEM
Malware Analysis	Cuckoo Sandbox · YARA · Any.run · Hybrid Analysis · PEStudio

CAREER OUTCOMES

SOC Analyst Tier 1	SOC Analyst Tier 2	Threat Hunter	Detection Engineer
SIEM Administrator	IR Analyst	Security Monitoring Lead	Threat Intelligence Analyst

CERTIFICATION ALIGNMENT

EC-Council CSA · CompTIA CySA+ · Splunk Core Certified User · Microsoft SC-200 · GCIA (GIAC) · Blue Team Labs Online

"SOC analysts are the first line of defence. Roblocksec CSA trains you to think faster than attackers, detect smarter than tools, and respond with precision when it matters most."
