

CYBER CRIME INVESTIGATION & DIGITAL FORENSICS

Evidence · Analysis · Cyber Law · Court-Ready Reporting

India's most comprehensive digital forensics programme — the only course that combines forensic science, Indian cyber law (IT Act 2000/2008, BNS), OSINT investigation, and court-room presentation skills into a single 60-hour curriculum.

Designed for aspiring forensic analysts, law enforcement professionals, corporate investigators, and legal practitioners entering the digital evidence space.

PROGRAMME AT A GLANCE

Theory: 45 Hours
Classroom

Practical: 15 Hours
Capstone Project

Total: 60 Hours

Law Covered: IT Act · BNS · Section 65B

60

Total Hours

10

Theory Modules

5

Capstone Phases

Court

Presentation Ready

PART A — THEORY CURRICULUM (45 Hours)

Module 1 ·
4 hrs

Digital Forensics Fundamentals

Introduction to digital forensics & scope · Types of digital evidence & characteristics · Digital forensic process & methodology · Forensic principles, chain of custody & evidence handling

Module 2 ·
5 hrs

Cyber Laws & Legal Framework

IT Act 2000 & 2008 — key sections & offences · Cyber crimes under BNS / IPC · Digital evidence & Section 65B requirements · Data protection & privacy laws (DPDP Act)

Module 3 ·
7 hrs

Computer & OS Forensics

Windows OS architecture & forensic artifacts · User activity analysis · USB & external device forensics · Linux forensics overview · macOS forensics overview

Module 4 ·
7 hrs

Disk & File System Forensics

Storage media & disk types · File system concepts: FAT, NTFS, EXT, APFS · File metadata & timestamps · Deleted file recovery concepts · Disk imaging & write blockers · Hashing & evidence integrity · File carving techniques

Module 5 ·
3 hrs

Memory (RAM) Forensics

Volatile vs non-volatile memory · RAM acquisition techniques · Memory analysis & malware trace identification

Module 6 · 5 hrs

Network Forensics

Network fundamentals for forensics · Network devices & log sources · Packet capture & traffic analysis · Network attack detection · Log correlation & network investigation

Module 7 · 5 hrs

Mobile Device Forensics

Android & iOS architecture · Mobile data extraction techniques (physical, logical, cloud) · Mobile artifacts: calls, messages, app data · Location evidence, media & cloud forensics

Module 8 · 3 hrs

Malware & Incident Response

Malware fundamentals & taxonomy · Malware analysis basics (static & dynamic) · Incident response lifecycle & containment

Module 9 · 4 hrs

Cyber Crime Investigation & OSINT

Types of cyber crimes · Investigation process & best practices · Phishing & online fraud investigation · OSINT techniques & dark web basics

Module 10 · 2 hrs

Reporting & Court Presentation

Forensic report structure & writing standards · Expert testimony preparation · Cross-examination strategies · Court presentation of digital evidence

PART B — CAPSTONE PROJECT (15 Hours)

REAL-WORLD INVESTIGATION SIMULATION

Each student receives a realistic case scenario and works through five sequential investigation phases — exactly as a professional investigator would in a real engagement.

- Phase 1 (2 hrs) — Case Allocation & Planning: Understanding the scenario, identifying evidence sources, legal & ethical considerations
- Phase 2 (3 hrs) — Evidence Collection & Preservation: Disk/mobile/log evidence identification, chain of custody documentation, imaging & hashing
- Phase 3 (5 hrs) — Evidence Examination & Analysis: Computer artifacts, disk analysis, mobile artifacts, network log & phishing indicators
- Phase 4 (3 hrs) — Report Writing: Case details, evidence description, analysis findings, timeline reconstruction, conclusion
- Phase 5 (2 hrs) — Presentation & Viva: Present investigation findings and defend methodology before an expert panel

CAREER OUTCOMES

Digital Forensics Investigator	Cyber Crime Analyst	DFIR Specialist	Malware Analyst
Corporate Investigator	Law Enforcement Cyber Expert	eDiscovery Analyst	Forensic Consultant

CERTIFICATION ALIGNMENT

CHFI (EC-Council) · CCE (ISFCE) · EnCE (OpenText) · GCFE (GIAC) · CompTIA Forensics · CDFE

"Digital evidence does not lie — but it must be properly collected, preserved, and presented to tell its story in court. Roblocksec DFIR trains every step of that journey."
